

Technology Requirements

THIS ONLINE COURSE REQUIRES ADEQUATE TECHNOLOGY AND INTERNET

Required Texts, Materials, or Equipment

You will need a laptop, desktop, or tablet. A keyboard is recommended. Your device will need to be connected to the high-speed Internet for video viewing.

Mobile Phones

The course will have basic responsive navigation to work on most smartphones. However, smartphones are NOT the intended platform for this course.

Wired Connection

For learners connecting to the Internet via wired connections, connection speeds of 1–4 megabytes per second (MBPS) is recommended. If several devices are accessing the Internet through one connection, you will need data throughput of at least 1 MBPS.

Wireless Connection

We recommend a minimum data throughput of 2–3 MBPS for learners accessing the course using a wireless connection, whether through a desktop, laptop, or mobile tablet because wireless connections are more susceptible than wired connections to interference.

Browser

The course was tested using Google Chrome Internet browser.

Technical Support

We wish to provide you with the best experience possible with the resources we have. This course has limited tech support due to finite funding and volunteer staff. Please post your questions in the Tech Support Help Desk using the “HELP” link in the navigation bar at the top of the course. We will respond as soon as possible. We care deeply about your safety when you travel abroad and want to help you. Please be understanding and patient.

Refund Policy

No refunds or credits.
